Partnership with Parents Session

Coding

Presenter: Michael Chua UplayWA

It's awesome to be living in a time where coders are referred to as the wizards of the future and that our ability to write code is the closest thing we have to a super power. Coding is also the new global language of this century. In this Partnership with Parents session at SDPS, we will explore the relevance of coding and where it fits in the scheme of things, what is coding in simple terms, how we (as parents) can facilitate coding at home and the benefits of coding for our kids. Don't forget your smart phone or tablet. Let's have a go ourselves...

This will be an informative and hands on session! Come along and join the fun!

Wednesday 23 August 2017
7 - 8pm
School Library
Light supper provided

Please RSVP on 93751133 or via email info@sdps.wa.edu.au
