

The National Quality Standards are informed by research on best practice to ensure high quality education and care is provided. At Sutherland Dianella PS we aim to adhere to all standards. Quality Area 2 relates to children's health and safety. Each week staff complete a playground safety check. Here the early childhood equipment, walk ways, drains and gates are monitored for hazards. We do this to make sure we provide a safe environment for children to play.

Quality Area 5 focuses on relationships with children. NQS 5.2 maintains each child is supported to build and maintain sensitive and responsive relationships with other children and adults. In C3 students have been doing this by participating in shared news. Parents shared information about their roles in our community and then we investigated them further through play. Building these positive relationships with parents allows students to feel safe and welcome in our school community and feel connected to those with whom they interact.
