

# Sutherland Dianella Helping Hands

## What has been happening at Helping Hands?

What a great three weeks we have had so far!!! The children have been having a great time conducting Science experiments. We have started to grow our own bean stalks they are coming along nicely in the window of Mr Rea's music room. We've also conducted two slime experiments one using a corn flour base and a PVA glue base and last week we have started to grow our own Geodes. The children have really been enjoying our program thus far! Julia has been helping with the reading group in B3 this term, children are doing such a fantastic job keep up the good work!

A huge thank you to Zeniah Woods' family for their donation of puppets and soft toys.

## What is coming up at Helping Hands?

This term we have implemented into our programming *All Things Science* every week we will be conducting a Science experiment. This week we have started our experiment How good are your Senses? The children have to wear a blind fold and guess what they are smelling. How exciting 😊

Week 5 Can you peel a raw egg?

Week 6 Mentos Challenge

Week 7 Rainbow Paper

**This week's riddle!**

**What has a face and two hands but no arms  
or legs?**
