

Sutherland Dianella Helping Hands

What has been happening at Helping Hands?

During week 4 we conducted a science experiment of Chemical reaction. They made their own sherbet using icing sugar, citric acid and their choosing of flavours Lemon, Strawberry or Mango. They all tried different flavours before making their own to take home and share with their families.

What is coming up at Helping Hands?

This term we have implemented into our programming *All Things Science* every week we will be conducting a Science experiment. This week we have started our experiment The Mentos challenge, we will be conducting our experiment outside to observe the chemical reaction when mentos mixes with a sealed bottle of soft drink.

Week 6 Mentos Challenge

Week 7 Rainbow Paper

Week 8 Lemon Volcano

This week's riddle!

Answer to last riddle: A clock

What is the easiest way to double your money?
