

# Partnership with Parents Session

## SENSORY PROCESSING

### **Sensory Processing in Children**

Curtin University Occupational Therapy students will present an informative and practical presentation about sensory considerations in children.

Sensory Processing is discussed a lot with regards to children having 'sensory overload' or 'sensory seeking' behaviour.

But do we really understand what we're saying and what it means for the child?

Unpicking the science behind sensory processing and how it relates to your child is really important as you can then find strategies to support them better and manage their levels of sensory arousal. Managing fluctuations of sensory arousal means that children can be more engaged, and find learning easier.

**Wednesday 14 June 2017 (Week 8)**

**9:30am in the School Library**

Morning Tea provided

Please RSVP at the office, by telephone 9375 1133 or
